Harmonie Mutuelle

Fullstack Java developer · assignment via Catamania

Performance, Insurance and Solvency tribe: income-protection, borrower and health processes, from the incoming flow to the screen.

- + Java 21, Spring Boot 4, Kafka and Spring Batch on PostgreSQL and Hibernate; Angular 19 micro-frontends; Spark for data analysis.
- + Bonita: started from zero, shipped the latest process end to end on my own.
- + Health went live in March 2026, first income-protection flows in production — and AI growing in the team, including a code-review agent.

Feb 2021 – Jun 2025

ACII by Audensiel

Mutuelle de Poitiers Assurances

Fullstack Java / Vue.js developer · assignment via ACII by Audensiel

A new application for the income-protection product, built from scratch by seven developers.

- + Java EE 8, Spring Boot and Hibernate back end; APIs secured with Spring Security.
- + Vue.js 2 and Vuex front end in TypeScript.
- + I also kicked off the development and architecture of the funeral-cover product.

Jan – Feb 2021

ACII by Audensiel

Tempo

Fullstack developer · internal project at ACII by Audensiel

ACII's internal resource-management tool, built between assignments.

- + Angular 11 front end; Java 15, Spring Boot and Hibernate back end.
- + A rotating team: documentation and end-to-end tests to pick it up fast.
- + One-week sprints, dailies, merge requests.

2020

Sopra Steria

Sopra Steria

Java / Angular developer, internship

Applications managing health professionals.

- + Migrating a Flex application to Angular 2, on a Java 8 back end.
- + Features and fixes, in Agile.

2019

Sopra Steria

Sopra Steria

Java / Flex developer, internship

Features and fixes on the same applications, in Flex and Java 8.
